

## LyngSat Report Feature

The LyngBox gives the user a possibility to report changes in channel data to LyngSat. This gives the entire user community the chance to help keeping LyngSat up-to-date.

Broadcasted information that does not match the information received from LyngSat, is indicated in red on the channel info screen. When information differ, it is possible to press [red] to send a report to LyngSat.

A preformatted e-mail will be presented with the change clearly marked. Before the message is sent, the user can enter his name and give additional details on the reported inconsistency, using the remote control or a connected keyboard.
